SUMMARY

MCA student at Goa University with experience in Android development, full-stack web development, and deep learning. Enjoy working on projects that solve real problems, collaborating in team settings, and picking up new technologies along the way.

EDUCATION

Master of Computer Applications (MCA)

Pursuing

Goa Business School, Goa University | Current SGPA: **8.10**

Bachelor of Science (BSc)

2022 – 2025

Govt. College of Arts, Science & Commerce, Sankhali | Goa University | CGPA: **8.83**

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, C, SQL

Web: React, Next.js, Node.js, Tailwind CSS

ML & AI: TensorFlow, Keras, librosa, NumPy, Pandas, scikit-learn

Android: Android SDK, Retrofit

Databases & Cloud: Firebase, Supabase, Redis, PostGIS, SQLite (Room)

Tools: Git, GitHub, Figma, Postman, Google Colab, Kaggle

Practices: REST APIs, Transfer Learning, Test Automation, Agile

SOFT SKILLS

Team Collaboration | Leadership | Problem Solving | Quick Learner | Time Management

ACADEMIC PROJECTS

1. LocalServe | Local Service Provider Platform

Group Project

TypeScript, Next.js 15, Supabase, Razorpay, Leaflet, Redis, PostGIS, Cloudinary

- **Objective:** Connect customers with verified local service providers in Panjim, Goa, with real-time booking and location-based discovery.
- **Tools:** Next.js 15 full-stack app with RESTful API routes; Supabase Realtime for live data synchronization; PostGIS for geospatial radius search; AES-256-GCM for chat encryption; Razorpay payment gateway.
- **Outcome:** Delivered role-based access control (RBAC) across Admin and Provider modules: KYC verification dashboard, multi-step onboarding, and a three-strike complaint and suspension system.
- github.com/blackspade1901/LocalServe

2. TrueRate | Smart GST Calculator & Barcode Scanner

Personal Project

Java, Android Studio, Firebase Firestore, Room (SQLite), Retrofit, CameraX, ML Kit

- **Objective:** Help shoppers instantly understand the full GST breakdown on any product by scanning its barcode.
- **Tools:** Parallel REST API calls via Retrofit across four product databases; Room (SQLite) for offline-first data access; CameraX and ML Kit for barcode scanning; MVC + Repository pattern.
- **Outcome:** Offline-capable Android app with 100+ automated tests (unit, integration, UI) at 100% pass rate; crowd-sourced unknown products become searchable for all users.
- github.com/blackspade1901/TrueRate

3. Bird Audio Classifier | Goa & Western Ghats

Personal Project

Python , TensorFlow , EfficientNetB0 , librosa , Streamlit

- **Objective:** Identify 10 bird species native to Goa and the Western Ghats from audio recordings to support wildlife monitoring.
- **Tools:** Preprocessed audio into mel-spectrogram images for image classification; applied transfer learning by fine-tuning EfficientNetB0 (CNN) via TensorFlow on 33,455 samples; deployed as a Streamlit web app.
- **Outcome:** Achieved 95.28% test accuracy (F1: 0.953); app displays confidence scores and an iNaturalist range map per prediction.
- github.com/blackspade1901/Bird-Identification-Through-Voices

4. Link-Up | Campus Communication App

Group Project

Java , Android Studio , Firebase Realtime Database

- **Objective:** Replace college notice boards and email chains with a single role-based app for students, faculty, and staff.
- **Tools:** Android SDK with Firebase Realtime Database for real-time data synchronization; separate navigation and role-based dashboards for student and staff users.
- **Outcome:** Enabled campus-wide notice delivery and a structured complaint and feedback system across all college roles.
- github.com/blackspade1901/linkup2

CERTIFICATIONS & TRAININGS

Introduction to Python | IBM

2024

- 10-day program covering Python fundamentals, Pandas, error handling, and introductory ML algorithms including linear regression.

Basics of Robotics | Acronix Workshop

2024

- 3-day workshop on Arduino programming and sensor types (IR, ultrasonic, temperature); built a working fire-extinguisher robot.

HACKATHONS & COMPETITIONS

Hackathon | Putzmeister

January 2024

- Analysed Putzmeister's corporate travel spending and proposed a cost-reduction strategy through policy changes and vendor optimisation.

CONFERENCES & SEMINARS

Volunteer | National Symposium on AI in Healthcare, Goa University

January 2026

- Assisted with event coordination at a national-level symposium on AI applications in healthcare; engaged with speakers, researchers, and attendees.

Talk Series: Semantic Web, Linked Data & Scientific Communication | University of Porto

January 2026

- 5-session series by Dr. Mariana Curado Malta on Semantic Web and Linked Data principles for structured, interoperable scientific knowledge.

Other Interests

Online Gaming | Dancing | Reading | Painting
